Subject index

Amines
The cathodic cleavage of the nitrobenzenesulfonyl group from aliphatic amines in *N*,*N*-dimethylformamide (Zanoni, Stradiotto) 141

Band filling
Probing the chemical stability of an electrically conductive material as a function of the degree of band filling. Electrochemical characterization of μ-oxo-(tetra-t-butylphthalocyaninato)germanium (LeBlevenec, Gaudiello) 97

Catalysis
A re-formulation of the Wagner and Traud additivity principle: catalytic and electrochemical experiments with iodide modified surfaces (Creeth, Spiro) 165
Structural effects in electrocatalysis. Ethylene glycol oxidation on platinum single-crystal surfaces (Marković et al.) 115

Ceric species
Weakening of the hole injection effect proceeding from the reduction of ceric species after oxidation of indium phosphide compounds (Khoumri et al.) 301

Charge-transfer electrode
Reactant solvation and kinetics of simple charge-transfer electrode reactions in mixed solvents (Górski, Galus) 27

Chloride ions
Periodic and aperiodic current oscillations induced by the presence of chloride ions during electrodissolution of a cobalt electrode in sulphuric acid solutions (Sazou, Pagitsas) 185

Cobalt
Periodic and aperiodic current oscillations induced by the presence of chloride ions during electrodissolution of a cobalt electrode in sulphuric acid solutions (Sazou, Pagitsas) 185

Convection
Computer analysis on natural convection in thin-layer thermocells with a soluble redox couple. Part 2. $E-I$ relation, electric power, heat flux and electrochemical heat pump (Ikeshoji et al.) 43

Current oscillations
Periodic and aperiodic current oscillations induced by the presence of chloride ions during electrodissolution of a cobalt electrode in sulphuric acid solutions (Sazou, Pagitsas) 185

Cyclic voltammetry
Cyclic voltammetric wave-shapes for microdisk electrodes: coupled effects of solution resistance, double-layer capacitance, and finite electrochemical kinetics (Safford, Weaver) 69

Cytochrome *c* peroxidase
A kinetic study of the catalysed oxidation of 1′,3-dimethylferrocen ethylamine by cytochrome *c* peroxidase (Cooper et al.) 155

Diffusion
Electrochemical growth of spherical clusters under joint ohmic, diffusion and ion-transfer limitations (Milchev) 267

Double-layer capacitance
Cyclic voltammetric wave-shapes for microdisk electrodes: coupled effects of solution resistance, double-layer capacitance, and finite electrochemical kinetics (Safford, Weaver) 69

Double potential step experiments
Solutions for the E mechanism in double potential step experiments (Wilder et al.) 1

$E-I$ relations
Computer analysis on natural convection in thin-layer thermocells with a soluble redox couple. Part 2. $E-I$ relation, electric power, heat flux and electrochemical heat pump (Ikeshoji et al.) 43

E mechanism
Solutions for the E mechanism in double potential step experiments (Wilder et al.) 1
Ethylene glycol
Structural effects in electrocatalysis. Ethylene glycol oxidation on platinum single-crystal surfaces (Marković et al.) 115

Ferrocene ethylamine
A kinetic study of the catalysed oxidation of 1′,3-dimethylferrocen ethylamine by cytochrome *c* peroxidase (Cooper et al.) 155
Formamide
The cathodic cleavage of the nitrobenzenesulfonyl group from aliphatic amines in *N*,*N*-dimethylformamide (Zanoni, Stradiotto) 141

Germanium
Probing the chemical stability of an electrically conductive material as a function of the degree of band filling. Electrochemical characterization of μ-oxo-(tetra-t-butylphthalocyaninato)germanium (LeBlevenec, Gaudiello) 97
Glassy carbon
Electrochemistry of xanthine oxidase at glassy carbon and mercury electrodes (Rodrigues et al.) 131
Gold
Electrochemical evidence of two-dimensional surface compounds of heterocyclic molecules at sulphur-covered gold and platinum. Part I. Methylene blue (Svetličić et al.) 205
Perchlorate adsorption on polycrystalline gold electrodes in aqueous perchloric acid (Borkowska, Stimming) 237
Graphite
Electrochemical STM on condensed guanine on graphite (Srinivasan et al.) 293
Guanine
Electrochemical STM on condensed guanine on graphite (Srinivasan et al.) 293

Heat
Computer analysis on natural convection in thin-layer thermocells with a soluble redox couple. Part 2. $E-I$ relation, electric power, heat flux and electrochemical heat pump (Ikeshoji et al.) 43
Heavy water
Radiochemical measurements of tritium during heavy water electrolysis at palladium cathodes in closed cells (Corrigan et al.) 175
Hole injection
Weakening of the hole injection effect proceeding from the reduction of ceric species after oxidation of indium phosphide compounds (Khoumri et al.) 301

Indium
Weakening of the hole injection effect proceeding from the reduction of ceric species after oxidation of indium phosphide compounds (Khoumri et al.) 301
Iodide modified surfaces
A re-formulation of the Wagner and Traud additivity principle: catalytic and electrochemical experiments with iodide modified surfaces (Creeth, Spiro) 165
Ion-transfer limitations
Electrochemical growth of spherical clusters under joint ohmic, diffusion and ion-transfer limitations (Milchev) 267

Kinetics
Cyclic voltammetric wave-shapes for microdisk electrodes: coupled effects of solution resistance, double-layer capacitance, and finite electrochemical kinetics (Safford, Weaver) 69
A kinetic study of the catalysed oxidation of 1′,3-dimethylferrocen ethylamine by cytochrome *c* peroxidase (Cooper et al.) 155
Reactant solvation and kinetics of simple charge-transfer electrode reactions in mixed solvents (Górski, Galus) 27

Mercury
Adsorption of 2-thiouracil at the mercury/electrolyte interface (Wandlowski) 245
Electrochemistry of xanthine oxidase at glassy carbon and mercury electrodes (Rodrigues et al.) 131
Methylene blue
Electrochemical evidence of two-dimensional surface compounds of heterocyclic molecules at sulphur-covered gold and platinum. Part I. Methylene blue (Svetličić et al.) 205
Microdisk electrodes
Cyclic voltammetric wave-shapes for microdisk electrodes: coupled effects of solution resistance, double-layer capacitance, and finite electrochemical kinetics (Safford, Weaver) 69

Microgravimetry
Polypyrrole electrogeneration at different potentials "Ex situ" microgravimetric control (Otero, Santamaria) 285

Nitrobenzenesulfonyl group
The cathodic cleavage of the nitrobenzenesulfonyl group from aliphatic amines in *N*, *N*-dimethylformamide (Zanoni, Stradiotto) 141

Palladium
Radiochemical measurements of tritium during heavy water electrolysis at palladium cathodes in closed cells (Corrigan et al.) 175
Pattern morphologies
Pattern morphologies in zinc electrodeposition (Trigueros et al.) 219
Perchlorate ions
Perchlorate adsorption on polycrystalline gold electrodes in aqueous perchloric acid (Borkowska, Stimming) 237
Phosphorus
Weakening of the hole injection effect proceeding from the reduction of ceric species after oxidation of indium phosphide compounds (Khoumri et al.) 301
Photocurrent
Mechanism of photocurrent and photovoltage in solar cells using n-silicon electrodes in non-aqueous solutions (Kobayashi et al.) 57
Photovoltage
Mechanism of photocurrent and photovoltage in solar cells using n-silicon electrodes in non-aqueous solutions (Kobayashi et al.) 57
Phthalocyaninato derivatives
Probing the chemical stability of an electrically conductive material as a function of the degree of band filling. Electrochemical characterization of μ-oxo-(tetra-t-butylphthalocyaninato)germanium (LeBlevenec, Gaudiello) 97
Platinum
Electrochemical evidence of two-dimensional surface compounds of heterocyclic molecules at sulphur-covered gold and platinum. Part I. Methylene blue (Svetličić et al.) 205
Structural effects in electrocatalysis. Ethylene glycol oxidation on platinum single-crystal surfaces (Marković et al.) 115
Pyrrole
Polypyrrole electrogeneration at different potentials "Ex situ" microgravimetric control (Otero, Santamaria) 285

Scanning tunneling microscopy
Electrochemical STM on condensed guanine on graphite (Srinivasan et al.) 293
Silicon
Mechanism of photocurrent and photovoltage in solar cells using n-silicon electrodes in non-aqueous solutions (Kobayashi et al.) 57
Solar cells
Mechanism of photocurrent and photovoltage in solar cells using n-silicon electrodes in non-aqueous solutions (Kobayashi et al.) 57
Solution resistance
Cyclic voltammetric wave-shapes for microdisk electrodes: coupled effects of solution resistance, double-layer capacitance, and finite electrochemical kinetics (Safford, Weaver) 69
Solvation
Reactant solvation and kinetics of simple charge-transfer electrode reactions in mixed solvents (Górski, Galus) 27
Spherical clusters
Electrochemical growth of spherical clusters under joint ohmic, diffusion and ion-transfer limitations (Milchev) 267
Sulphur
Electrochemical evidence of two-dimensional surface compounds of heterocyclic molecules at sulphur-covered gold and platinum. Part I. Methylene blue (Svetličić et al.) 205
Sulphuric acid
Periodic and aperiodic current oscillations induced by the presence of chloride ions during electrodissolution of a cobalt electrode in sulphuric acid solutions (Sazou, Pagitsas) 185

Tetrathienylsilane
Tetrathienylsilane as a precursor of highly conducting electrogenerated polythiophene (Roncali et al.) 277
Thermocells
Computer analysis on natural convection in thin-layer thermocells with a soluble redox couple. Part 2. $E-I$ relation, electric power, heat flux and electrochemical heat pump (Ikeshoji et al.) 43
Thiophene
Tetrathienylsilane as a precursor of highly

conducting electrogenerated polythiophene (Roncali et al.) 277

2-Thiouracil

Adsorption of 2-thiouracil at the mercury/electrolyte interface (Wandlowski) 245

Tritium

Radiochemical measurements of tritium during heavy water electrolysis at palladium cathodes in closed cells (Corrigan et al.) 175

Wagner and Traud additivity principle

A re-formulation of the Wagner and Traud additivity principle: catalytic and electrochemical experiments with iodide modified surfaces (Creeth, Spiro) 165

Xanthine oxidase

Electrochemistry of xanthine oxidase at glassy carbon and mercury electrodes (Rodrigues et al.) 131

Zinc

Pattern morphologies in zinc electrodeposition (Trigueros et al.) 219
